SUBJECT INDEX TO THE STATE REVENUE NEWSLETTER

Whole Numbers 120-132(1976-1977)

Compiled by David L. Drury

This listing for the years 1976 and 1977 continues the same format adopted with publication of the cumulative index in 1976. Entries are confined to subjects only, although it is possible in these issues to identify the author or contributor, the expanded space required for such inclusion exceeds what is readily available. Similarly, no effort has been made to list any doings of the State Revenue Society or any articles, editorials or letters to the editor not directly concerning specific states or subjects.

Entries appear first as alphabetical listings by states, then again alphabetically by stamp usages. Local material appears at the end of the state listings. Because of different terminologies used in different states or different authors, it is wise to scan the entire state listing for pertinent material on a particular subject. This is especially true in seeking items on liquor taxation (variously listed under liquor stamps, liquor seals, beer and wine stamps, etc.) and for any fish and game items (duck stamps, fishing licenses, hunting permits, fish and game stamps, etc.).

Notation is by Whole Number and page: 121:19 refers to Whole Number 121, page 19. Wherever page numbers are absent they have been added in usual sequence. Material published so that it could be removed from the body of the NEWSLETTER if desired is indexed as if it were still stapled within the publication.

Two issues bear the Whole Number 127. Items appearing in the March, 1977 issue are indexed as Whole Number 127(1). Items in the May, 1977 issue are indexed as 127(2). Whole Number 130 was skipped to correct the sequence error caused by this mistake.

While it does not affect the index, members should note that the March, 1976 issue bears an erroneous Volume number; it should read Volume 16, No. 2 (not No. 1). The September and November, 1976 issues are listed as Volume 15; correct listing is Volume 16.

Any errors in this compilation should be brought to the attention of the editor so they may be corrected in future indexes.
