Volume 7, Number 3

January, 1967

Whole Number 67

OHIO BEDDING - The following listing of these stamps has been suggested by Mr. Bloom.

BE1 Yellow green on green (fugitive) paper. 20 $\frac{1}{2}$  x 28 mm. Perf. 12 $\frac{1}{2}$ .  
(This is variety listed by Hubbard in the catalog)

- a. green on green paper
- b. green on light gray-green (almost white) paper
- c. green on dark green paper

BE2 same design, yellow green, rouletted

BE3 square design, no value, light green on green, perf. 12 $\frac{1}{2}$ .

- a. dark green on light green
- b. dark green on blue green
- c. olive green on gray green
- d. light green on light green

BE4 1¢ light green on green, 21 x 21 mm.

BE5 2¢ blue on blue surfaced paper

BE6 2¢ blue on blue (1963?)

- a. blue on blue gray (1965?)

- b. blue on blue, cracked plate upper right

BE7 2¢ black on light blue

The cracked plate variety probably occurs on only one stamp in the sheet. Mr. Bloom has this in a multiple but was unable to pinpoint the location in the sheet. This mark occurs over the upper right ornament to edge of the stamp.

MINNESOTA OLEOMARGARINE - There was an error in description of Type R of the large stamp illustrated in the last issue. The border is the same; the difference lies in the presence of dots between stamps. These occur only internally in the sheet, none on outside towards edge of sheet. Thanks to Mr. Hermann for this information and also for the following new listing.

There are several major varieties of the small pressure-sensitive stamps currently in use. The most recent variety has heavy "l" without serif, tiny c (¢), and the map reduced horizontally, as well as differences in lettering. We also illustrate one of the earlier types for comparison. Mr. Litchfield is compiling a complete listing of these stamps.

OHIO SEED - Mr. Bloom sends the 1966 stamp which we illustrate. Color is now black on pink paper.

IS YOUR ADDRESS CORRECT? Please check the label on the envelope in which this issue was mailed and notify us immediately of any errors. This, and all future issues, will be sent 3rd Class.

WEST VIRGINIA BEER - CORRECTION

Mr. Hermann informs us that the stamp reported in the November issue is yellow and blue (not black).

WASHINGTON SPORTSMEN'S COUNCIL -

Both Charles Hermann and E. L. Vanderford sent additional information. This stamp was also used in 1956 and 1958. The 1956 stamp has printed text "MEMBER WASHINGTON STATE SPORTSMEN'S COUNCIL - 1956 - 25¢" but no design. It was in red on white paper. The 1958 issue is same design as 1957 but red and dark green on green paper and is much larger, 40 x 40 mm.

Proceeds from sale of these went into fish and game conservation work and, although not required by the State, their purchase was encouraged by printing a square space on the reverse of hunting licenses for the three years involved with the inscription "This Space for Washington State Sports Council Membership Stamp - 25¢. NOT REQUIRED BY LAW".

A letter from Howard E. Nelson, Secretary of the Council, causes your Editor to believe these stamps were discontinued because the Game Department was advised it was illegal for them to encourage donations in this manner.

WANTED -- Iowa oleomargarine tax stamps. I am making a specialized study of these issues. Will purchase or trade for anything from a single stamp to a box full.

CARTER LITCHFIELD  
412 West Brookside  
Bryan, Texas 77801

WANTED - REVENUES-TAX PAIDS-REVENUE STAMPED PAPER OF - THE U.S. POSSESSIONS Before, during and since U.S. administration. Philippines; Puerto Rico; U.S. Virgin Islands; Vera Cruz, Mexico, during U.S. 1914 Occupation; Hawaii & Alaska. Free of Tax Cigarette Labels. Literature on Entire World's Revenues.

ROBERT H. SHELLHAMER  
2364 Crestview Road  
Pittsburgh, Pa. 15216

WANTED - A response from the members! Unless more interest is expressed, the auction suggestion will be abandoned.

MAINE TOBACCO - Mr. Bloom submits the following list of decals. All are on cream safety card, rouletted 6 $\frac{1}{2}$ . All except the 3¢ have black design; the color given refers to the background.

1¢ brown	8¢ dark orange	30¢ white
1¢ blue	10¢ bright blue	40¢ pale lilac
2 $\frac{1}{2}$ ¢ red	10¢ blue	60¢ yellow
3¢ all pink	12¢ dark lilac	75¢ cerise
4¢ purple	25¢ cream	75¢ pink
5¢ light lilac	25¢ yellow	90¢ green
		\$1 pale blue green

Some of the above are known only from punched remainders and at this writing it is uncertain how many were used. According to State officials, the Tobacco Products Tax Act which necessitated these decals was repealed Dec. 31, 1955 and all stamps relative to that act have now been destroyed. The only decal tax stamp currently in use is that on cigarettes which represents a tax of 8¢ per pack.

MINNESOTA CERTIFICATION LABELS - Examples of these were submitted by Charles Hermann and Carter Litchfield. We illustrate the stamp for a case of 12 containers. This is printed in black, rouletted 10 $\frac{1}{2}$ , and there is no indication of face value. The stamp for 24 containers is the same design. Both may be found rouletted 3 $\frac{1}{4}$  at top but is probably not a major variety. Those with 3 $\frac{1}{4}$  roulette may be the top stamps in a sheet. Mr. Hermann says the Wine stamps also have this in positions J and T in the 20 stamp sheet. Also seen is the 12 container stamp imperforate.

Another variety reported is similar in size and design to the 1945 liquor-wine stamps but since value is on one line below seal, reading "CERTIFICATION FEE 1 CENT", the lower half is devoted to the Certification text.

Mr. Hermann also reports a 1¢ red on yellow decal on cream safety card, rouletted 6 $\frac{1}{2}$  horizontally in black between panes of 4. This was intended for use on bottles but a block of 12 was pasted on a carton

OHIO CIGARETTE - Illustrated are two varieties submitted by Mr. Bloom and Mr. Lichtenberger. The larger stamp is a decal printed in brown. Details on the card are not available. The other appears to be of the heat-transfer type. It is printed in black against a green background.

LOUISIANA FEED TAGS - Mr. Hermann reports the following varieties for the 1913-14 Season. These are the same design as the tag illustrated in the February 1960 Newsletter.

Printed in red: 20, 100, 143, 150, 167, 175, 200 lbs, (blank) lbs.

Printed in black: 100, 167, 200 lbs.

There is no indication of the product on which these tags were to be used unless color distinguishes the product. Since both feed and fertilizer sizes are represented in the set, this would suggest that the same tags could have been used on either product. But with the exception of the 100 lbs. none of these would be insecticide sizes.

LOUISIANA FEED - Some of these stamps have been found without control numbers although the letter is present. These stamps were pasted on packages of 1000 stamps delivered by the printer and were intended only to identify the contents of the package. Others have been seen punched with irregular circular holes 5-7 mm. in diameter for the same purpose. Your editor has seen the following:

Control No. Missing:

1935-36 8 1/3 lb. (also punched with hole)

1941-42 8 1/3, 25, 50, 100 lbs.

1942-43 8 1/3, 10, \_\_\_ lbs.

Punched:

1935-36 8 1/3 (control No. 06)

1943-44 100 lbs.

1944-45 10, 100 lbs.

1945-46 25, 100, \_\_\_ lbs.

1946-47 10, 50 lbs.

Some of these have much wider straight edge margins, suggesting they were cut from printer's waste and in a few cases the stamp has no other characteristics which would have prevented its use. Included in this category are the 50 and 100 lbs. of 1942-43 and the 10, 50, and \_\_\_ lbs. of 1943-44. Considering the low face value of most feed stamps, one extra stamp in 1000 couldn't have resulted in any great loss to the State. This was probably a routine procedure by the printer (Eureka Specialty Printing Co.) who does quite a bit of State revenue work.

LOUISIANA INSECTICIDE - Some Additional Notes - Your editor now has a specially printed address label used on an envelope containing stamps to be redeemed. Apparently the Insecticide stamps were exchanged or redeemed at any time but had to be returned in envelopes bearing this label. I also have a slip recording a 300 lb. Paris Green stamp sent in for refund. This would have been a provisional value which is unknown in collections.

The 1937 set was printed by Dennison.

IF 18 and IF 19 exist punched with 6 mm. holes and, like the feed stamps, were used to identify the contents of packages of stamps. IF 25 was punched with a 3 1/2 mm. hole. If feed stamps could be found punched in the same manner, it might be possible to more positively date this stamp.

TENNESSEE VEGETABLE SEED -

Mr. Smotherman shows us the illustrated label. The copy sent had been affixed to a tag. It is printed in black except for the No., dates, and seal which are in green. Mr. Smotherman will be glad to send a copy of this as well as the common variety of the 1¢ feed stamp illustrated below plus the 2¢ and 4¢ perforated seed stamps. The 2¢ is red, 4¢ violet. When writing for these, be sure to include a self-addressed, stamped envelope. The use of commemoratives on your mail and a reciprocal gift of stamps from your state would be appreciated. His address is 1220 N. Spring St., Murfreesboro, Tenn. 37130.

TENNESSEE FEED - The upper stamp in the pair shown has a flaw consisting of a white area following the last "E" in "TENNESSEE". This appears to be a constant variety as it occurs in the same position on all the sheets Mr. Smotherman has seen. It is the first stamp on the left margin of the sheet in the next-to-last row from the bottom.

OREGON CIGARETTES - This tax is new since July. The larger stamp is a decal, red on green background except "Oregon" and "20 Cigarettes" in white. The smaller stamp is of heat transfer type, lettering in black on green background except "OREGON" again in white. The meter is in orange.

CALIFORNIA DOCUMENTARY - D214 (\$5 carmine) occurs in a variety spelled "REVENUK" according to Mr. Bloom.
